## Learning Points

### The First Conditional

You can use the first conditional to talk about actions and situations in the future.

There are two parts to the sentence.

One part is the **condition**. The other part is the **result**.

Form:

*If + subject + Simple Present tense + subject + will/won't*

You use a comma after the condition in this form.

You can flip the two parts of the sentence so that the result comes first. It can be in interrogative form.

Form:

*Will/Won't + subject + if + subject + Simple Present tense ?*

You can also use the future time clauses *when* and *after* in the condition.

| Condition                           | Result                                 |
|-------------------------------------|----------------------------------------|
| <i>After it rains,</i>              | <i>we will go inside.</i>              |
| <i>If we leave at 4 p.m. sharp,</i> | <i>we'll get to the camp by 9 p.m.</i> |

| Result                                      | Condition                            |
|---------------------------------------------|--------------------------------------|
| <i>Will we visit the museum</i>             | <i>when we have time?</i>            |
